

SIDEone LP Series Door Operators

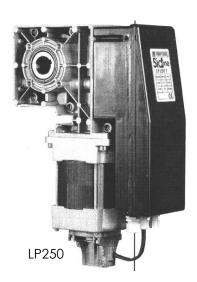

Shaft mounted for unbalanced doors, 3 phase and 1 phase

(Above) LP400 to LP 650 with inbuilt safety brake, hand crank, and mounting feet.

Complies with European safety standards EN 12453, EN12604

The SIDEone units are designed for use on unbalanced roller shutter doors and are normally shaft mounted.

They can be used on high usage car park doors and solve the problem of broken springs.

The operators can be controlled by a conventional reversing starter, logic panels or the QC series low voltage control panels.

SIDEone LP Series features include:

- Removable hand crank with safety switch.
- 2 standard limit switches and 2 safety limit switches
- In built safety brake
- High duty cycle up to 60%
- Control panel has provision for PE beams and radio controls.

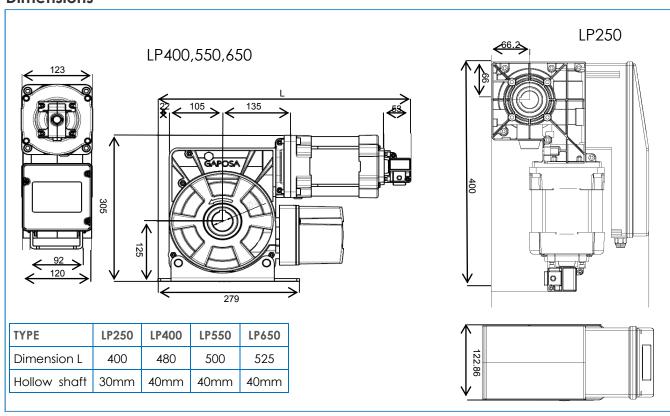

Options include:

- Output shaft can be fitted for LH or RH mounting.
- Floor level hauling chain.
